(Consumer No.) _____

Ref: Application no. _____ dated _____

Sir / Madam,

With reference to above-mentioned Application number, after conducting technical feasibility study, approval is accorded for installation of Solar Rooftop PV system of _____ kWp in your premises.

Following are the terms and conditions for installing the system:

1. All components of Solar Rooftop PV system must comply with applicable BIS/IEC standards. Please find attached a list of standards to be complied with attached with this approval letter. (**Annexure – I**)
2. You shall submit the copy of Manufacturers Test Certificates for all components for having complied with relevant BIS/IEC standards of the selected model along with **Work Completion Report (FORM A5)** duly certified the system installer.
3. In case of any changes required at your premises due to this proposed installation, these shall be performed by you at your own cost.
4. The grid connectivity of the system shall be as per the AERC's applicable Regulations any amendments thereof from time to time and shall confirm to requirements of Assam Solar Energy Policy - 2017.
5. The Interconnection Agreement shall be signed with APDCL before commissioning of the RTS Plant to the Grid (**FORM A4**)
6. All the safety measures and standards of the installed system must comply with requirements as stated in the relevant CEA/AERC Regulations and all standards referred to in those Regulations.
7. You shall submit the following documents after installation of Solar Rooftop PV system:
 - a. Inspection report from APDCL / No Objection Certificate from the Office of

- Chief Electrical Inspector, Govt. of Assam (as applicable);
- b. Work Completion Report (**FORM A5**).
 - c. Specification sheets of all equipments and manufacture's test reports

This approval is valid for 180 days from the date of issuance of letter and the Solar Rooftop PV system is to be commissioned within this period, failing which the approval will stand cancelled.

You may download all technical specifications, standards and other requirements of the solar rooftop system from www.rodalee.com
